

SYNTAX OF AN *if* STATEMENT

```
x <- c(8, 3, -2, 5)

if(any(x < 0)) {
  print("x contains a negative number")
}
```

Instead, we can assess if *any* x values are less than 0

Now what do you expect to happen?

SYNTAX OF AN `if` STATEMENT

```
x <- c(8, 3, -2, 5)

if(any(x < 0)) {
  print("x contains a negative number")
}

[1] "x contains a negative number"
```

Instead, we can assess if **any** x values are less than 0

Now what do you expect to happen?
