

SYNTAX OF A `for` LOOP

```
for(i in 1:100) {  
  <do stuff here with i>  
}
```

For each `element` in a `sequence`
performs defined `tasks`

SYNTAX OF A `for` LOOP

```
for(i in 1:100) {  
  <do stuff here with i>  
}
```

```
for(i in seq_along(x)) {  
  <do stuff here with i>  
}
```

For each element in a sequence performs defined tasks

Alternative - why use `seq_along`?
