

SHORTCUTS FOR SPECIFYING `.f`

Can you find what variables in the `nycflights13::flights` data have missing values and how many missing values they have?

SHORTCUTS FOR SPECIFYING .f

Can you find what variables in the `nycflights::flights` data have missing values and how many missing values they have?

```
nycflights13::flights %>% map_dbl(~ sum(is.na(.)))
```

year	month	day	dep_time	sched_dep_time
0	0	0	8255	0
dep_delay	arr_time	sched_arr_time	arr_delay	carrier
8255	8713	0	9430	0
flight	tailnum	origin	dest	air_time
0	2512	0	0	9430
distance	hour	minute	time_hour	
0	0	0	0
